

Resume Shmuel Hayempour

I am 26 years old and have been doing IT firm (ITP.NYC) since I was 17. I started with OS reinstallation, basic networking and troubleshooting for home users. I have moved on to small-midsize businesses and eventually advanced Networking at 22. I deal predominately in Windows with PowerShell as my Commandline however am also comfortable in Debain or any Unix shell really and CMD. I dislike macOS however can get around it if I absolutely must.

I'm most familiar with Sonicwall routers but have worked on many others in the past and don't find them all too different or complicated to pickup.

I work with exchange servers and Office 365 and am most affluent in them I do have some limited knowledge with Google for business however usually move my clients over to Office 365 due to them using the Exchange protocol as oppose to IMAP or POP3.

I have been freelancing on own mostly but I have had two Jobs in it, One for a school and other for a IT Firm.

The School I worked for is Jewish Institute Of Queens which I have been working with for about 3 years. I handled everything IT related for them form installing the desktops and printers to setting up their Network infrastructure and Servers. Some projects I have worked on in the school have been

1. PXE server with image creation and deployment.
2. Active Directory with advanced features like automatically assigning user permissions based of Organization Unit.
3. SSO for content filter.
4. Protected Networking zones to only allow data originating from defined MAC Addresses.
5. Backup infrastructure that included: File, Image and Archival backup.

You are welcome to get in touch with the head of Operations there Jonathan Abrams - operations@jiq.org (646) 996-0101.

To be completely honest my work ethic was not up to par there as I would regularly be paid weeks or even months late. However as a rule I am very dedicated to my work always give it my all just as long as there is mutual respect.

My other Job has been with ITSupportNYC. I working for them for about 4 months before quitting. Working for them wasn't bad but I felt the work was very routine and simple not a good fit for me. My Employer was David Katz - david@ITSupportNYC.com (718) 878-4682 Ex 1.

You can also get in touch with some of my clients:
